## RESEARCH INTERESTS

---

I am interested in how species traits have changed over deep time, including both the way in which traits affect biodiversity through time and, reciprocally, are affected by changing biodiversity. I generally employ phylogenetic comparative methods, utilizing a combination of life history, molecular, and paleontological data in a synergistic framework to ask questions from a variety of perspectives.

## EDUCATION

---

- 2017 **Ph.D. University of Illinois at Chicago**, Ecology and Evolution  
Advisor: Dr. Roberta Mason-Gamer  
Thesis title: The Evolutionary Ecology of a Highly Diverse Lineage of Birds (Telluraves).
- 2011 **MRes, Imperial College, London**, Ecology, evolution & conservation  
Advisors: Dr. Timothy Barraclough and Dr. Jarrod Hadfield
- 2009 **BSc, Cardiff University, UK**, Zoology

|----------------|--|
| 2019 – present | <b>Postdoctoral Scholar</b> , The University of Chicago, with Dr. David Jablonski<br>Construction of time-calibrated phylogenies for bivalves to ask a variety of questions on the fluctuating diversity seen in the group.  |
| 2017 – 2019    | <b>Postdoctoral Fellow</b> , The University of Texas at Austin, with Dr. Julia Clarke<br>With a focus on Palaeognathae, research questions include the dating of radiations, rates of morphological evolution and lineage diversification, as well as the quantification of adaptive radiations over macroevolutionary scales. |
| 2012           | <b>Research Assistant</b> , University of Oxford, with Dr. Jarrod Hadfield<br>Research on whether long-term selection for increasing body size could be detected over only a few generations.  |
| 2011           | <b>Visiting Scholar</b> , University of Missouri at St Louis, with Dr. Robert Ricklefs<br>Establishing whether clades of birds with reduced taxonomic richness have a distinct morphological signature.  |
| 2011           | <b>Research Assistant</b> , University of Edinburgh, with Dr. Jarrod Hadfield<br>Part of a research team investigating whether female birds can actively regulate the hormones found in their eggs, or whether it is a passive reflection of their body condition.   |

## INVITED TECHNICAL TALKS

---

- |  |   |
|--|---|
| 2019 – Dept. of Integrative Biology, The University of Texas at Austin | <i>Using path analyses to unravel complex biological systems</i>                          |
| 2018 – Dept. of Integrative Biology, The University of Texas at Austin | <i>Using analyses of morphological evolution to infer the ecological history of birds</i> |
| 2018 – Field Museum of Natural History, Chicago                        | <i>Using morphological analyses to infer the evolutionary history of birds</i>            |
| 2013 – Dept. of Ecology & Evolution, University of Chicago             | <i>Ecological specialization: causes and consequences</i>                                 |

## CONFERENCE PRESENTATIONS

---

- |  |  |
|--|--|
| 2019 – Geological Society of America, Phoenix, Arizona   | <i>Mass estimation of extinct taxa and phylogenetic data both influence analyses of character evolution in a large clade of birds (Telluraves)</i> |
| 2018 – Society of Vertebrate Paleontology, Albuquerque, New Mexico                                   | <i>Global cooling and the evolution of gigantic flightless birds</i>   |
| 2016 – Society for the Study of Evolution, Austin, Texas   | <i>Total-evidence analyses support a Cretaceous origin of Telluraves</i>   |
| 2016 – Geological Society of America, Denver, Colorado   | <i>Total-evidence analyses support a Cretaceous origin of Telluraves</i>   |
| 2013 – Ninth Annual University of Michigan Early Career Scientists Symposium, University of Michigan | <i>Evolution of host specificity in avian lice: a re-analysis</i>  |

## TEACHING AND MENTORING EXPERIENCE

---

During my doctoral research I taught a variety of introductory-level courses. These included those where my responsibilities involved classroom instruction, such as in 'Biology of Populations & Communities' and 'Ecology & Evolution', as well as practical activities in a wet lab setting for a genetics course. As part of my involvement in these courses I gave several undergraduate lectures. Additionally during my doctoral research I gave workshops to my peers on techniques I had learned that could be applied to a variety of questions, for example on the use of Approximate Bayesian Computation.

As a postdoctoral fellow I have been part of a research methods class, offered to both undergraduate and graduate students, which develops practical skills for students to answer their own research questions. During this class I gained extensive experience in how to provide constructive feedback, give guidance to ensure students can complete their assignments, as well as develop experience developing problem solving approaches to teaching the statistical program R.

Instructional modules detailing implementation of the research methods course are in press on CUREnet.

Clarke, J. A., N. Crouch, C. Eliason, K. Ellins, L. Legendre, A. Papendieck, Curiosity to Question, *in press*

### Teaching appointments

2012 – 2017 Teaching Assistant, Dept. of Biological Sciences, University of Illinois at Chicago

## GRANTS AND AWARDS

---

- **Elmer Hadley research award** University of Illinois at Chicago. Awarded for proposals that best demonstrate contributions to students' research goals that are likely to result in original publications
- **Student travel awards** University of Illinois at Chicago

## PROFESSIONAL SERVICE

---

### Peer review

- Systematic Biology
- American Naturalist
- Evolution
- Zoological Journal of the Linnean Society
- Global Ecology and Biogeography
- Scientific Reports
- Proceedings of the Royal Society: B
- Oecologia

### Symposia attended

- Sound origins: Vocalizations, mechanisms and evolution, 2019, The University of Texas at Austin
- The Rise of Modern Biodiversity - A Workshop addressing Critical Transitions in the History of Life, 2017, Field Museum of Natural History, Chicago
- Ninth Annual University of Michigan Early Career Scientists Symposium, 2013, University of Michigan

### Professional societies

- Society for the Study of Evolution
- American Society of Naturalists
- Society of Vertebrate Paleontology
- Systematics Association

## OUTREACH

---

**Members night, Field Museum of National History** Meet museum members at special events used to describe how the collection is utilized for answering a range of questions in evolutionary biology.

**Scientific adviser, Rooster Teeth Productions** Provide a range of information for a YouTube science video on the morphological and physiological adaptations present in hummingbirds enabling their flight style.

**Volunteer judge, Jackson School Research Symposium** Evaluate poster presentations of undergraduate students on research projects they have undertaken.

**Volunteer, Explore UT** Open day for members of the public to visit the university and learn about a range of different skeletons.

## TECHNICAL TRAINING

---

- **X-ray diffraction** A method for the identification of unknown crystalline compounds by quantifying the angle at which x-rays are scattered
- **R** I am proficient in the use of the statistical program R. I regularly use custom scripts for my research and use markdown to communicate the code and results
- **High performance computer clusters** I am comfortable using high performance computer clusters for the analysis of large data sets. To date, I have used two different systems via remote access for my research.
- **Digital post-processing for x-ray computed tomography** I have received instruction on the program Avizo to analyze scanned material and separate preserved material from surrounding matrix

## FIELDWORK EXPERIENCE

---

2010 – 2012	Edinburgh, UK I performed three field seasons as part of a team carrying out research on a small European passerine (Blue tit, <i>Cyanistes caeruleus</i> ), recording breeding times in combination with data on growth rates and survival rates of chicks.
2010	United Kingdom Masters research project investigating whether two sympatric species of rotifer exhibit different phylogeographic signal
2009	Kenya Undergraduate field course involving mammal and invertebrate surveys, as well as quantification of spatial variation in termite mound dimensions
2008	Llysdim, Wales, UK Week long undergraduate field course incorporating river invertebrate and small mammal forest surveys.
